eDataCenter Partners with Insol to Provide Dedicated Hosting Solution for Girl Scouts of Historic Georgia, Inc.

ATLANTA, Georgia, May 05, 2009 – eDataCenter – a state of the art, fully redundant, secure data center and Insol -- Atlanta's leading managed network and IT services provider for small and medium size businesses – are pleased to announce a partnership with the Girl Scouts of Historic Georgia, Inc. to provide a dedicated hosting solution.

Girl Scouts of Historic Georgia asked Insol to perform a comprehensive technology review and build a plan to guide the new council over the next 3-5 years. Insol's solution was to build a centralized network residing at eDataCenter to consolidate IT infrastructure and support at each branch office at lower cost and higher security.

“Our core competency is leadership development for girls, not technical infrastructure,” said Margaret Skene, CEO of Girl Scouts of Historic Georgia. “Insol and eDataCenter have worked as true partners with us to develop effective technologies that support our service to girls across our large jurisdiction.”

“eDataCenter has made tremendous effort to engineer their data center in a way that rivals the best data centers in the world,” said Angel Martinez, Vice President, Enterprise Division, Insol. “By using eDataCenter's unique, proprietary cooling system, they have taken the lead in Atlanta on applying green technologies to the application of disaster recovery and data storage solutions and that is a perfect fit with the Girl Scouts of Historic Georgia's mission.”

"Insol's ability to virtualize the Girl Scouts of Historic Georgia's system, to improve the performance and redundancy and reduce the system's overall footprint, coupled with our ability to reduce their downtime, allowed for a win/win for everyone involved," said Eric Klein, Managing Director, eDataCenter.

eDataCenter and Insol have partnered to provide data center hosting solutions for many of Insol's clients and have formed a powerhouse technology partnership. eDataCenter and Insol provide enterprise level technology at scalable price points for Georgia's small and medium sized businesses.

####
